Summary

Front-End Developer with 3+ years of experience creating fast, user-friendly web applications using Vue.js, Angular, and modern tools. Strong in performance optimization, clean architecture, and scalable Ul design. Proven ability to deliver responsive platforms for government, non-profit, and e-commerce clients.

Experience

Front-End Developer, *KeyFrame*　　　　　　　　　　　　　　　　　　　　　08/2024 – Present
Cairo, Egypt

- Developed multiple enterprise and public-facing applications using Vue 3, Angular (up to v19), and modern front-end practices.
- Built the Kuwait Food Bank Platform using Vue.js - a responsive donation portal supporting both monetary and gold donations. Optimized performance through lazy loading and dynamic rendering, enhancing responsiveness across devices.
- Developed MissHelpers, a labor-matching platform for roles such as babysitters, drivers, and maids. Created a custom dashboard for managing worker profiles and statuses using CMS-driven architecture to enable dynamic section/page control.
- Contributed to the Dhofar Government Portal (Oman) using Angular 19, delivering a multilingual, media-rich website covering the region's cities and data. Focused on performance optimization and CMS integration to enable full content control.
- Built components for the Done Enterprise Management Platform, supporting project tracking and internal workflows , Implemented Gantt chart views, Kanban boards, real-time notifications, and automated reports.
- Technologies used: Angular (v10-19), Vue 3, Nuxt.js, TypeScript, RxJS, NgRx, REST APIs, PrimeNG, CMS, SCSS, Lazy Loading, Responsive Design.

Front-End Developer, *ABG*　　　　　　　　　　　　　　　　　　　　　　02/2022 – 08/2024
Cairo, Egypt

- Initially joined as a front-end intern, then transitioned to a full-time role after 6 months based on performance and contribution.
- Developed and maintained the Affiliate System, a comprehensive platform managing vendor transactions, financial tracking, and order fulfillment workflows from seller to client.
- Delivered responsive Uls that improved vendor management efficiency and operational visibility.
- Contributed to the Aladdin Furniture Platform, enhancing the e-commerce experience for interior and decoration products.
- Built key modules for the Repin System, a logistics dashboard to manage delegate movements and delivery tracking.
- Technologies used: Vue.js (v2), Vuetify, Vuex, JavaScript, HTML5, CSS3, and jQuery.
- Collaborated with back-end developers and project managers to integrate APIs and deliver complete solutions across various projects.

Education

Bachelor of Business Information Systems, BIS Program, *Tanta University*　　09/2021 – 05/2025
Tanta, Egypt
